

## Technical data sheet

### AROMA DIFFUSER M-1200 - SCENT MARKETING

	Intensity level	Stop time (s)	Running time (s)	Duration charge (h)	Duration charge days
	1	300	10	10.795	900
	2	300	30	2.827	236
	3	300	60	1.327	111
	4	300	100	774	64
	5	210	90	633	53
	6	120	60	452	38
	7	120	90	349	29
	8	120	120	292	24
	9	90	120	241	20

- The duration of the perfume tank reflects an assumption with 12 hours of daily operation.
- At the medium intensity level (5) the consumption in one month (25 working days) would be 250 ml approx.
- Consumption may vary slightly depending on the perfume used due to its different density.

### General characteristics

- The aroma diffuser M-1200 for Scent Marketing is indicated to aromatize medium and large spaces of up to 1.200 m<sup>3</sup> approx. in a quiet, homogeneous and clean way, with a dry mist of fragrance that expands effectively and continuously throughout the room.
- Its micro cold fogging system emits small scent particles below 5 microns by means of an air pressure pump, transforming the perfume from a liquid to a gaseous state, guaranteeing an excellent suspension in the environment and optimizing consumption.
- Thanks to its intuitive and exact programming with time and/or intensity regulation, it can adapt perfectly to the aromatization requirements of any room, without wetting, staining, or leaving any trace.
- Successful aesthetics and easy wall or desktop installation.
- Can be installed to directly aromatize the room or connect to the A. C. through the accessories supplied, thus taking advantage of the full potential of this magnificent and professional aroma diffuser.
