

Technical data sheet

AROMA DIFFUSER G-4000 - SCENT MARKETING

	Intensity level	Stop time (s)	Running time (s)	Duration charge (h)	Duration charge days
	1	300	10	3.991	333
	2	300	30	1.416	118
	3	300	60	772	64
	4	300	100	515	43
	5	210	90	429	36
	6	120	60	386	32
	7	120	90	300	25
	8	120	120	257	21
	9	90	120	225	19

- The duration of the perfume tank reflects an assumption with 12 hours of daily operation.
- At the medium intensity level (5) the consumption in one month (25 working days) would be 700 ml approx.
- Consumption may vary slightly depending on the perfume used due to its different density.

General characteristics

- The aroma diffuser G-4000 for Scent Marketing is indicated to aromatize large spaces of up to 4.000 m³ approx. in a quiet, homogeneous and clean way, with a dry mist of fragrance that expands effectively and continuously throughout the volume to be perfumed.
- Its micro cold fogging system emits small scent particles below 5 microns by means of an air pressure pump, transforming the perfume from a liquid to a gaseous state, guaranteeing an excellent suspension in the environment and optimizing consumption.
- Thanks to its intuitive and exact programming with time and/or intensity regulation, it can adapt perfectly to the aromatization requirements of any room or volume, without wetting, staining, or leaving any trace.
- Successful aesthetics and easy wall or desktop installation.
- Can be installed to directly aromatize the room or connect to the A. C. through the accessories supplied, thus taking advantage of the full potential of this magnificent, professional and powerful aroma diffuser.

AROMA DIFFUSER G-4000	
Code	MKF 2600
Placement	Wall / Table
Power supply	220 V
Power	16 W
Sonority	40 dB
Coverage area	Until 4.000 m ³
Material	Stainless steel sheet epoxy painted
Color	White
Perfume tank capacity	650 ml
Measurements	280 x 120 x 280 mm
Weight	4,20 kg
