

## BLOQUES DENZ

Enzymatic deodorizer for urinals

### CHARACTERISTICS

Product formulated especially for the elimination of odors in urinals. Its enzymatic action hydrolyzes fat organic matter transforming it into water-soluble residues, which in turn and thanks to biological degradation are transformed into basic natural components (water and carbon dioxide). It prevents incrustations through the production of acid by-products that reduce the pH and thus help to avoid the precipitation of calcium carbonate.

### HOW TO USE

Directly insert the tablet into the urinal. It can also be applied inside the plastic protector in order to avoid seals of external elements.

### PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Solid and compact block of 40 g
Colour	Blue
Odour	Citric
pH (1%)	8
Water solubility	Soluble in water

### PRESENTATION

Containers of 500 g and 3 kg

### PRECAUTION

Danger

**Hazard indications:** Eye Dam. 1: H318 - Causes serious eye damage. Skin Irrit. 2: H315 - Causes skin irritation. EUH208: Contains Citronellol. May produce an allergic reaction

**Cautionary advice:** P264: Wash thoroughly after handling. P280: Wear protective gloves/protective clothing/eye protection/face protection. P302+P352: IF ON SKIN: Wash with plenty of water. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310: Immediately call a POISON CENTER or doctor/physician. P332+P313: If skin irritation occurs: Get medical advice/attention. Do not ingest. Keep out of the reach of children. In case of accident, consult the Medical Service of Toxicological Information Tel. 0034 915620420.

**Substances that contribute to the classification:** Benzenesulfonic acid, C10-13-alkyl derivs., sodium salts.

### ADDITIONAL INFORMATION

While the above information is correct to our criteria, as the conditions of use of the product are beyond our control, we disclaim any responsibility for incorrect use of the product.
