

CHARACTERISTICS

Pickling and acidic cleaner for all types of soils that do not evolve irritant or corrosive vapours. It prepares surfaces for further crystallize and/or wax processing. It removes easily and completely eliminates limescale, plaster, cement, rust and other debris which can alter the crystallize process. With 1 liter can be treated between 30-40 m², depending on soil and porosity of the pavement.

HOW TO USE

Apply it dissolved in water, between 10-20 %, depending on scale and soil quality. Treat small areas with scrubber or rotary machine, using black or brown disk, rinsing quickly with water to avoid prolonged contact of the product on the surface. It is very important the complete removal of the etchant, since any residue thereof may effect subsequent polishing treatment.
