

DELENEX DR

Automatic dishwasher detergent
Hard water

CHARACTERISTICS

It's an alkaline detergent of high performance and controlled foam for washing of crockery and glassware in all types of automatic dishwashers, indicated in areas with water up to 60 °F lime.

Formulated with high alkalinity agent's, high content of lime sequestrants and saponifying power, DELENEX DR gives a great power of cleaning and degrease, removes all dirt, organic waste and pigmentation spots caused by food remains, whether they are dairy, protein, coffee, tea, wine, etc. and achieving total hygiene.

Thanks to its sequestering effect, prevents scale deposits in the machine and objects to be cleaned.

HOW TO USE

Dose 2-4 g per liter of water, depending on the soiling and water hardness.

In automatic dosing machines, connect directly to the outlet of the dosing detergent container.

It's recommended to work at a temperature between 55-65 °C and follow the instructions on the machine.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Transparent liquid
Colour	Brown
Odour	Characteristic
pH (10 %)	13
Density (20 °C)	1170 kg/m ³
Solubility in water	Soluble in water

PRESENTATION

5, 10 and 20 litres containers

PRECAUTIONS

Hazard statements: Met. Corr. 1: H290 - May be corrosive to metals.
