

DELENEX A
Automatic polisher
indicated in hard / very hard water

CHARACTERISTICS

DELENEX A is an additive for the rinse water in machines and tunnels of automatic dishwashing, specially formulated for medium or high water hardness.

It provides fast drying and shining, avoiding the formation of films and chalky stains on washed objects. Due to its special characteristics of formulation, prevents limescale in the rinse circuits of the machine. Specially designed to be combined with our automatic dishwashing DELENEX M or DELENEX DR to obtain excellent results.

HOW TO USE

Connect the container directly into the circuit of the machine, dosing between 0.2-0.5 gr per litre of water, depending on the quality of the water. It is recommended to work at a temperature between 80-90°C and follow the instructions of the machine.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Transparent liquid
Colour	Blue
Odour	Odourless
pH (10%)	2.7
Density (20°C)	1020 kg/m ³ .
Water solubility	Easily soluble in water

PRESENTATION

10 and 20 litres container
