

CHARACTERISTICS

Product formulated to raise the pH of pool water when it is less than 7.2. It is important to keep the water pH between 7.2 and 7.6 to avoid problems of skin irritation and mucous membranes of bathers, materials corrosion and while making better use of disinfectants.

HOW TO USE

It is a product formulated to be dosed in the pools through automatic control equipment and measuring pH. To increase two-tenths of pH unit, add 5 liters approx. of increaser per 100 m³ of water. This dose is indicative, since it depends on water characteristics (hardness, salt content, etc.).

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Transparent liquid
Colour	Brown
Odour	Odourless
pH (10%)	14
Density (20 °C)	1200 kg/m ³
Solubility	Soluble in water

PRESENTATION

10 and 20 litres containers

PRECAUTIONS

Hazard statements: Met. Corr. 1: H290 - May be corrosive to metals. Skin Corr. 1: H314 - Causes severe skin burns and eye damage.

Precautionary statements: P234: Keep only in original container. P280: Wear protective gloves/protective clothing/eye protection/face protection. P301+P330+P331: IF SWALLOWED: rinse mouth. Do NOT induce vomiting. P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. P304+P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Do not ingest. Keep out of the reach of children. In case of accident, consult to the Medical Service of Toxicological Information Tel. 0034 915620420.

Substances that contribute to the classification: Sodium hydroxide.

ADDITIONAL INFORMATION

While the above information is correct to our criteria, as the conditions of use of the product are beyond our control, we disclaim any responsibility for incorrect use of the product.
