

LAVAPER BLANCOR

Bleaching chlorinated textile High Chlorine Concentration

CHARACTERISTICS

Bleaching textile formulated with sodium hypochlorite and with high stabilized active chlorine content. Indicated for washing of white clothing in professional laundries, it is very effective on all types of stains, including those of pigmentation, like wine, coffee, tea, etc., reinforcing the action of washing detergent and at the same time acting effectively as whitener and deodorant.

Do not use on coloured laundry, chlorhexidine stains, delicate garments, wool, nylon, or in combination with enzymatic detergents because the chlorine deactivates the enzymes.

To avoid deterioration and yellowing of garments when drying at high temperature, make sure that the chlorine is neutralized at the end of the washing process. The best whitening performance and the lowest tissue deterioration are achieved by keeping the water temperature at approx. 45 °C. and pH around 10 in the wash bath.

Meets ASTM E2406-16 which evaluates the effectiveness of laundry disinfectants for use in operations with high efficiency washes, diluted in 0.35 % water at 10 minutes (*Pseudomonas aeruginosa*, *Staphylococcus aureus* and *Klebsiella pneumoniae*).

Storage conditions: Chlorine degrades easily, so store it in a cool place, protected from light and for the shortest time possible.

HOW TO USE

Dose LAVAPER BLANCOR in the whitening phase or together with the washing detergent to perform a mixed washing and bleaching process, thus obtaining a higher performance.

The dose of use will be between 5 and 15 ml of product per kilo of dry clothes, depending on the hardness of the water, dirt to be removed and water level of the washing machine. The temperature of the water should not exceed 55°-60° C and a pH of 10 approx. in the wash bath.

To avoid deterioration of the tissues, it must be taken into account that at a higher temperature the dose of product must be lower.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Transparent liquid
Colour	Yellowish
Odour	Chlorine
pH	12
Density (20°C)	1235 kg/m ³
Solubility	Miscible in water

PRESENTATION

10 and 20 litres container

PRECAUTION

Danger

Hazard statements: Skin Corr. 1B: H314 - Causes severe skin burns and eye damage. Aquatic Acute 1: H400 - Very toxic to aquatic life. Aquatic Chronic 2 H411 Toxic to aquatic life with long-lasting effects. Met. Corr. 1: H290 - May be corrosive to metals. EUH031 Contact with acids liberates toxic gas.

Precautionary statements: P280: Wear protective gloves/protective clothing/eye protection/face protection. P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower. P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing. P501: Dispose of contents/container in accordance with local/regional/national/international regulation. Do not ingest. Keep out of the reach of children. In case of accident, consult the Medical Service of Toxicological Information Tel. 0034 915620420.

Contains: Sodium hypochlorite, solution 10% < Cl < 20%, with 15% of chlorine.

ADDITIONAL INFORMATION

While the above information is correct to our criteria, as the conditions of use of the product are beyond our control, we disclaim any responsibility for incorrect use of the product.
