Data sheet

LAVAPER TEN BOX+C

Surfactant component Super concentrate BOX+C system

CHARACTERISTICS

LAVAPER TEN BOX+C is used in textile washing, both in professional laundries and in hotels and residences, for cleaning dirty clothes.

It is a neutral detergent with high cleaning power, whose formulation based on special surfactants allows the saponification of oils, fats and other organic substances.

It contains sequestering agents that complex the calcium ions present in the water, avoiding the precipitation of salts in hard water, so it can be used in water of any hardness.

It can be used on both white and coloured clothing.

HOW TO USE IT

It is used in the automatic washing of clothes. For dirty or very dirty clothes it is recommended to use together with LAVAPER ALC BOX+C. It can be dosed in both cold and hot water following the doses indicated in the following table, expressed in g/kg of dry clothes:

Type of dirt	Pre-wash	Wash (with pre-wash)	Wash (without pre-wash)
Slightly dirty	2,0 - 3,0 g	3,0 - 4,0 g	4,0 - 5,0 g
Dirty	3,0 - 4,0 g	4,0 - 5,0 g	5,0 - 6,0 g
Very dirty	4,0 - 5,0 g	5,0 - 6,0 g	6,0 - 7,0 g

In hard and very hard waters it is recommended to increase the doses by 30%. In tunnels washes they can be reduced by 10% due to the greater mechanical action in the wash.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance Liquid

Colour Blue

Odour Characteristic

pH (1 %) 7.5 Density (20 °C) 1042 kg/m³

Solubility Easily soluble in water

PRESENTATION

Box with 10 liter bag

PRECAUTION

Danger

Hazard statements: Eye Dam. 1: H318 - Causes serious eye damage.

Precautionary statements: P280: Wear protective gloves/protective clothing/eye protection/face protection. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310: Immediately call a poison center/doctor.

Supplementary information: EUH208: Contains Isoeugenol. May produce an allergic reaction. Do not ingest. Keep out of the reach of children. In case of accident, consult to the Medical Service of Toxicological Information Tel. 0034 915620420.

Substances that contribute to the classification: Alcohols, C12-18, ethoxylated.

ADDITIONAL INFORMATION

While the above information is correct to our criteria, as the conditions of use of the product are beyond our control, we disclaim any responsibility for incorrect use of the product.
