

## LAVAPER CLORO

**Bleaching chlorinated powder  
High Chlorine concentration**

### CHARACTERISTICS

Bleaching powder for textiles formulated with a high content of active chlorine. Suitable for professional laundry, it is very effective on all types of stains, including pigmentations such as wine, coffee, tea, etc., reinforcing the action of the washing detergent and simultaneously acting with total efficiency with its cleansing, bleaching and deodorant action.

Thanks to its form of powder does not suffer losses of chlorine, as it is usual with this type of bleachers in liquid form. Do not use on coloured clothes, chlorhexidine stains, delicate garments, wool, nylon or in combination with enzymatic detergents because the chlorine deactivates the enzymes.

To avoid deterioration and yellowing of garments with the high temperature drying, ensure that the chlorine is neutralized at the end of the washing process.

The best bleaching performance and the lowest tissue deterioration are achieved by keeping the water temperature at approx. 45 °C and pH around 10 in the wash bath.

### HOW TO USE

Dose LAVAPER CLORO during the bleaching phase or together with the washing detergent to perform a mixed of washing and bleaching process, obtaining a higher performance.

The usage dose will be between 4 and 8 g of product per kilo of dry clothes, depending on the hardness of the water, dirt to be removed and the water level of the washing machine. The temperature of the water should not exceed 55°-60 °C and a pH of 10 approx. in the wash bath.

To avoid deterioration of tissues, it must be taken into account that at a higher temperature the bleach dose should be lower.

### PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Powdery solid
Colour	White
Odour	Characteristic
pH (1%)	10
Solubility	Soluble in water

### PRESENTATION

10 kg bucket

### PRECAUTION

Warning

**Hazard statements:** Aquatic Chronic 2: H411 - Toxic to aquatic life with long lasting effects. Eye Irrit. 2: H319 - Causes serious eye irritation. STOT SE 3: H335 - May cause respiratory irritation.

**Precautionary statements:** P271: Use only outdoors or in a well-ventilated area. P280: Wear protective gloves/protective clothing/eye protection/face protection. P304+P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P403+P233: Store in a well-ventilated place. Keep container tightly closed. P501: Dispose of contents and / or containers in accordance with regulations on hazardous waste or packaging and packaging waste respectively.

**Supplementary information:** EUH031: Contact with acids liberates toxic gas. Do not ingest. Keep out of the reach of children. In case of accident, consult the Medical Service of Toxicological Information Tel. 0034 915620420

**Substances that contribute to the classification:** Troclosesene sodium, dihydrate.
