

LAVAPER OXIGEN
**Active oxygen base concentrated
whitening**

CHARACTERISTICS

Bleaching and stain remover made from active oxygen, for washing clothes in industrial processes. Product of high performance, high solubility and easy dosage, it is very effective in cleaning all types of stains, even at low temperature and in water of any hardness.

It respects and enhances colours of the treated fabrics. It can be used on any type of textile fibre (except wool and nylon) without degrading it, obtaining a longer duration of the garments. It does not fix any type of stain, eliminating even chlorhexidine stains. The product allows the recovery of yellow clothes, obtaining exceptional degrees of whiteness.

HOW TO USE

It can be used alone in the bleaching bath or in combination with the detergent, performing simultaneously a simultaneous washing and bleaching process, obtaining therefore a higher performance.

The dose of use varies between 4 and 8 gr per kilo of dry clothes, depending on the hardness of the water, dirt to remove and water level of the bath. The maximum efficiency is obtained at temperatures below 50 °C.

For shock treatments these doses must be increased to 10-15 g / kg of dry clothing, depending on the degree of yellowing or creasing of the tissues.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Solid granulated
Colour	White
Odour	Scented
pH (1%)	11
Density (20°C)	1000 kg/m ³
Solubility	Soluble in water

PRESENTATION

10 kg containers

PRECAUTION

Danger

Hazard statements: Eye Dam. 1: H318 - Causes serious eye damage. Skin Irrit. 2: H315 - Causes skin irritation.

Precautionary statements: P264: Wash thoroughly after use. P280: Wear protective gloves/protective clothing/eye protection/face protection. P302+P352: IF ON SKIN: Wash with plenty of water. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing. P310: Immediately call a poison center/doctor. P332+P313: If skin irritation occurs: Get medical advice/attention. Do not ingest. Keep out of the reach of children. In case of accident, consult the Medical Service of Toxicological Information Tel. 0034 915620420

Contains: Disodium carbonate, compound with hydrogen peroxide (2:3); Sodium metasilicate pentahydrate.

ADDITIONAL INFORMATION

While the above information is correct to our criteria, as the conditions of use of the product are beyond our control, we disclaim any responsibility for incorrect use of the product.
