

LUBACIN BOX

Enzymatic deodorant for hygienic containers

CHARACTERISTICS

Perfumed enzymatic deodorant for hygienic containers, it absorbs the bad scents caused by the decomposition of the organic matter. It slowly releases a pleasant orange-lemon scent through the porous bag. It contains 12 bags of 20 g each, a mixture of natural mineral vehicles and microorganisms, which have the capacity to fix humidity, volatile inorganic molecules and to degrade associate organic molecules of bad scents.

HOW TO USE

Deposit a bag of LUBACIN BOX in the interior of each new refuse sack placed in the hygienic container. Each bag will stay effective during 1 month. The bags are sealed and should not be opened at any time.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Dry powder contained in a permeable sachet
Colour	Light brown
Odour	Orange and lemon
pH	Not relevant
Density (20 °C)	1000 kg/m ³
Solubility	Insoluble in water

PRESENTATION

Container of 12 and 150 units
