

NETTION ABS

Absorbent granules spill

CHARACTERISTICS

Solid granules, natural and fireproof, with high water retention capacity is indicated for the collection of spills on any surface.

It is always ready for use, being an essential tool in situations of potential spills; garages, factories, shops, gas stations, kitchens, etc., and all those places where liquids are stored or handled, dangerous or not, risk drips or leaks.

Quickly and efficiently absorbs any liquid such as water, oils, fuels, cleaners, dyes, etc., avoiding any danger and preventing discharge to sewers, avoiding environmental pollution.

HOW TO USE

Apply it extending over the entire affected surface, focusing on the edges of the spill to prevent its expansion. The power absorption is very high, but the amount to apply depends on the nature and volume of the spill.

The product is harmless to the environment, but the waste generated after its use must be handed over to an authorized waste manager.

Do not use on spills of acids.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Hygroscopic powder colloidal clay
Colour	Beige
Odour	Odourless
pH	9,5-10
Density (20°C)	60-200 kg/m ³
Solubility	Insoluble in water and oils

PRESENTATION

8 and 16 kg container

PRECAUTION

CLP Regulation (EC) nº 1272/2008: The product is not classified as dangerous.
Do not ingest. Keep out of the reach of children. In case of accident, consult to the Medical Service of Toxicological Information Tel. 0034 915620420.

ADDITIONAL INFORMATION

While the above information is correct to our criteria, as the conditions of use of the product are beyond our control, we disclaim any responsibility for incorrect use of the product.
