

SANICLOR TABLETAS

Chlorine-based effervescent tablets

CHARACTERISTICS

Quick-dissolving cleaning, bleaching and deodorizing tablets, formulated based on active chlorine that are indicated for cleaning surfaces in those cases where a total and thorough cleaning is required: kitchens, bathrooms, showers, saunas, gyms, etc.

SANICLOR tablets are easy to handle and dose, releasing chlorine when diluted in water, so they do not cause losses of chlorine, as it happens in liquid chlorine products.

HOW TO USE

Dissolve 1-2 tablets of SANICLOR in 8-10 litres of water warm, can be applied to surfaces with cloth, mop, by pulverization or immersion of the element to clean.

Do not mix with any other chemical product or use to treat drinking water.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Crystalline solid in the shape of tablets of approximately 3,35 g
Colour	White
Odour	Chlorine
pH (1 %)	6.5
Solubility	Soluble in water

PRESENTATION

1 kg container

PRECAUTION
