

CHARACTERISTICS

Concentrated emulsion of specific waxes indicated for sealing and polishing of hard floors. TRAVI 02 can be used for both the re-polishing by spray method of the most affected areas with major loss of brightness, and as a sealant after the application of our crystallizer TRAVI 01.

It improves the glossing layer, hardening it and prolonging its life considerably.

It shows even effective in high traffic locations, obtaining excellent results in all kinds of hard surfaces.

HOW TO USE

Spray the product with a pulveriser in areas between 2 and 4 m², applying the rotatory machine with white fibre disc or microfiber, insisting until getting the desired brightness. Once it is completely dried, a better result can be obtained by rubbing with a soft cloth or mop.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Opaque liquid
Colour	White
Odour	Odourless
pH (10%)	8,7
Density (20°C)	1010 kg/m ³
Water solubility	Forms an emulsion

PRESENTATION

5 litres container

PRECAUTION

Supplementary information: EUH208: Contains Mixture of: 5-chloro-2-methyl-4-isothiazolin-3-one and 2-methyl-2H -isothiazol-3-one (3:1). May produce an allergic reaction. EUH210: Safety data sheet available on request. Do not ingest. Keep out of the reach of children. In case of accident, consult the Medical Service of Toxicological Information Tel. 0034 915 620 420.

ADDITIONAL INFORMATION

While the above information is correct to our criteria, as the conditions of use of the product are beyond our control, we disclaim any responsibility for incorrect use of the product.
